

CM18 Evo Cash Recycler

Evolution of the species.

CM18 Evo Cash Recycler

THE PRODUCT

With a completely revolutionary design and sleek user interface, the CM18 Evo bridges the gap between teller- and consumer-led transactions. Adaptable components give the Evo extraordinary versatility for use as either a teller or customer tool.

Finally, a single product gives your tellers the power of cash recycling then lets you decide when you (and your customers) are ready to put the power of cash automation in their hands.

FEATURES

We engineered complete customization into the design of the Evo to fit all of your operational needs—no matter where you are in your branch transformation process.

The Evo can begin in your teller line and incrementally transition to a partial then fully customer-driven device. The ergonomic design ensures comfort and ease of use for both sitting and standing operation. And through a series of add-ons, such as a touch screen interface and user-centric LEDs, customer usability is enhanced.

SPECS
